

NOTE

Froeschneropsidea, A Replacement Name for the Preoccupied Genus *Froeschnerisca*
(Hemiptera: Heteroptera: Miridae: Deraeocorinae: Hyaliadini)

The hyaliidine genus *Froeschnerisca* was proposed by Henry and Ferreira (2003) in honor of the late Richard C. Froeschner to accommodate *Hyaliodomiris andinus* Carvalho, a species known only from Bolivia and Peru (Carvalho 1953) and subsequently transferred to the genus *Hyaliodorcoris* Knight (Carvalho 1957). We have discovered that *Froeschnerisca* Henry and Ferreira is preoccupied by *Froeschnerisca* Coscarón, 1997 (Heteroptera: Reduviidae). As a result, we propose the replacement name **Froeschneropsidea**, new name, for the primary junior homonym *Froeschnerisca* Henry and Ferreira, 2003. *Froeschneropsidea andinus* (Carvalho), the type of the genus and only included species, is a **new combination**.

Acknowledgments.—We thank Manuel Baena (Departamento de Biología y Geología, I.E.S. Trassierra c/o Avda. Arroyo del Moro s/n14011 Córdoba, Spain) and Dimitri Forrero (Department of Entomology, Cornell University, Ithaca, New York) for kindly bringing the above case of homonymy to our attention.
